Anzalna Kainat

Front-End Developer | React Js | Next Js

Karachi, Pakistan | anzalnakainat@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Detail-oriented Front-End Developer with a Computer Science degree and strong expertise in React.js, Redux Toolkit, and Next.js. Skilled in developing efficient and engaging web applications that deliver superior user experiences. Result-driven and committed to applying my technical skills to contribute to impactful projects and drive tangible business outcomes.

AREA OF EXPERTISE

- React.js
- Redux Toolkit
- Next.js
- API Integration
- JavaScript
- TypeScript
- Git
- Tailwind CSS
- Bootstrap
- HTML5
- CSS3
- Figma

EDUCATION

Bachelor in Computer Science | University of Sindh | CGPA: 3.81 / 4.00   Jan 2020 - Jan 2024

CERTIFICATION

- **[Meta Front End Developer Specialization](#):** Certified in HTML, CSS, JavaScript, React, and UX/UI design. This comprehensive training included advanced React coursework, version control with Git, and hands-on experience through capstone projects, ensuring a deep understanding of front-end development principles and practical application.

PROJECTS

- **YouTube Clone Application:** Developed a responsive React JS application featuring video sections, custom categories, channel pages, and video playback using Material UI (v5) and RapidAPI for data fetching.

- **Real Estate Application:** Created a React and Next.js application with rental and for-sale properties, advanced filtering, property details page with image carousel, and a user interface using Chakra UI, leveraging RapidAPI for data fetching.

- **The Daily Dose News Application:** Developed a news app that offers a filtering feature for countries, allowing users to select a country and then filter news by various categories. This application is built using React.js and integrates with NewsAPI to fetch the latest news.
